MPK KIOSK

Truly Multi-Purpose. Mount it to a wall, put it on a stand, on a counter top, bolt it to the floor, add any peripheral such as a printer or card reader.

This kiosk has evolved over many years to become our most popular because of it's ability to suit almost any self-service situation.

Compact and Unobtrusive, the **MPK** can provide intuitive self-directed interactions or transactions, in locations where space is at a premium. The **MPK** is ideal for retail shops, entry foyers and reception areas, as well as demonstration suites, product displays or exhibitions.

Often used in conjunction with our Personnel Directory Solution, it can act as a virtual receptionist, with visitors able to search a directory and contact the person they are meeting by the attached handset.
