Spike and surge protection	Additional signage / branding options	
	Metal road case on wheels	

SPARC KIOSK

A robust, versatile transactional kiosk. The Sparc can house a huge array of peripheral devices including large printers, and high security devices such as coin and cash mechanisms.

The Sparc features a 19" LCD monitor, stainless steel fascia and solid curved aluminium sides. An interchangeable signage panel with optional backlighting provides prominent and effective branding. This can be upgraded with a second LCD display to run attract loops or advertisements if desired.

Some examples of its usage include hotel check-in, ticketing, photo printing, on-demand cd-burning, and gaming.
