37" VANTAGE

The Vantage indoor kiosk offers an elegant solution to interactive touchscreen kiosks. This premium indoor solution has been designed specifically to meet interactive mapping and wayfinding requirements.

The Vantage is capable of running media, showcasing information and displaying maps oriented to the user's position, as well as running video, flash, text messaging and branded advertising content. A web based management system can be used to easily update the displayed information and develop custom messages tailored to the kiosk audience.

The Vantage brings inviting aesthetics to urban environments, with its solid non porous aluminium surface it can easily be kept clean and restored to its original condition.

With its large format landscape screen, this digital kiosk solution is ideal for seated or standing access and high traffic areas including wayfinding around entertainment complexes, airports, museums, casinos, retail centres, universities and hospitals.
