**46" VIVID DUO**

The **Vivid Duo** is a robust dual sided kiosk suitable for harsh outdoor conditions (and can be used indoors as well).

The **Vivid Duo** is a premium dual screen kiosk with interactive touchscreen on one side and the option of second interactive touchscreen, digital signage, or backlit static signage on the reverse. The **Vivid Duo** has the capability to run media on both screens, showcase information and display maps oriented to the user's position.

High brightness and contrast as well as the option of air-conditioning make the **Vivid Duo** a great choice for outdoor usage. It is weather proof and works in extremely hot or cold environments. The large portrait screen makes it ideally suited to outdoor areas such as sporting complexes, city or town centres, parks, zoos, public transport hubs.
