ZAP KIOSK

Freestanding and portable. **The Zap** has evolved over the years to be the kiosk of choice for non-permanent installations.

Sleek and elegant, the **ZAP** won an Australian Design Award for its design excellence. The rear moulding has been optimised in CAD software for maximum strength and high aesthetic appeal. **The ZAP** features a 17" high resolution LCD display in a package standing just under 1.3m.

Tradeshows and small retail spaces are perfect for the **ZAP**. Its compact dimensions make it ideal for situations where space is at a premium. Optional finishes include an embedded logo or graphic for a unique branding presence. Custom artwork can also be applied to the fascias if desired.
